To Whom It May Concern,

As a Western trained physician and practitioner of Traditional Chinese Acupuncture, I have observed Dean Kraft's work (the "laying on of hands") with patients in my office for the past 6 1/2 years. The results are astounding. There have been many dramatic cases. For example, a woman with pancreatic cancer which had spread to the liver is now tumor free, and a 4 year old child with paralysis of his legs, from a progressive degenerative neuro-muscular disease, is now walking.

I have also observed the progress of Nelda Buss for the past 14 months through video tapes (since she is treated in New York City). Her case of Amyotrophic lateral sclerosis (Lou Gehrig's disease), a rapidly progressing degenerative disease of the spinal chord with resultant muscle paralysis, was arrested and reversed by treatment with Dean Kraft. To regenerate nerves in the spinal chord is quite impossible from a Western medical point of view. Yet, from a quadraplegic state, Nelda Buss is now walking.

There is no scientific explanation for what I have observed. Nevertheless, the truth is obvious. I have seen people getting well from diseases that "should" be fatal of at least progressive.

If sharing my experiences with Dean Kraft's healing's can be helpful to you, I am available.

Very truly yours,

Marcy Goldstein, M.D.
