Senator Ted Kennedy  
Boston, MA

June 13, 2008

Dear Senator Kennedy:

I am writing this letter out of concern, caring, and appreciation for who you are and all you have done for our country.

I am a retired plastic surgeon currently practicing Classical Acupuncture. I became involved in the alternative health field thirty five years ago through my own personal journey with healing using Western and Energy Medicine. Twenty nine years ago I met Dean Kraft, an Energy Healer, who I believe is one of the most powerful healers in the world. I have personally experienced and observed first hand with many of my patients miraculous cures take place with Dean that are beyond what Western medicine can do or explain.

One of my personal healing experiences with Dean concerned the cure of a glomus jugulare tumor (locally invasive but not metastasizing) in my neck that disappeared after treatment, and my wife had a parotid tumor that disappeared with treatment from Dean. I observed Dean treating my patients over a period of many years and curing many forms of cancer, paralysis, and serious diseases too numerous to enumerate. In the past Dean has cured several cases of glioblastoma multiforme. His success rate is about 90% in all his healings.

I strongly urge you to consider treatment with Dean Kraft for the situation you are now facing. I know God's power comes through his hands. We know that millions join me in wishing that your health is returned for you, your family, and your country.

May God bless you in all ways.

  
Marcy A. Goldstein, M.D.
